## Holy Wars

vim vs emacs vim  
tabs vs spaces spaces

## ABOUT ME

#geek #maker #freelance #team\_player #manager #devops #elasticsearch\_expert #UI/UX #data\_pipelines #architecture #real\_time #tel\_aviv

My name is Moshe, I love to code, from **deployment** scripts to database **admin UI** and **mobile applications**.

In the last four and a half years, I worked at **Forter** (<https://forter.com>) as a all-over team member (CI/CD, Deployments, ETLs, Backend), team leader (data engineering, data science, and backend), and internal tools developer.

I served in an enterprise SRE team of an elite branch in the 8200 alumni.

Whether you need a fast prototype of a product, speed up your CI environment or build an internal tool to boost your employee work, drop me a line and let's chat 😊

## OPEN SOURCE PROJECTS

**Kipp - Secure Payments App** (<https://github.com/ikimia/kipp>) React Native Firebase

Discontinued project

POC for a simple and secure payments app using One-Time-Code to initiate the transaction

**Elasticsearch Comrade** (<https://github.com/moshe/elasticsearch-comrade>) Python VueJS Javascript ElasticSearch

Work in progress

Elasticsearch admin panel built for ops and monitoring

**Tomato Bot** (<https://tomato-bot.com>) Python VueJS Javascript

Gain faster feedback for your tests, in GitHub

**ElasticSearch Loader** ([https://github.com/moshe/elasticsearch\\_loader](https://github.com/moshe/elasticsearch_loader)) Python ElasticSearch

A tool for batch loading data files (json, parquet, csv, tsv) into ElasticSearch

**tplot** (<https://github.com/moshe/tplot/>) Javascript

Easy to use plotting tool for the terminal

## TECHNICAL SKILLS

**PYTHON** ★★★★★

8 years of experience, mixed with production critical systems, web services, data ETLs, deployment and monitoring

**ELASTICSEARCH** ★★★★★

Managed several production clusters in different workloads. 1.5TB/day logs cluster, 20TB cluster for a real-time web app, query optimizations, write optimizations and more

**VUEJS** ★★★★★

Three years of experience of writing web applications using VueJs, including this CV page 😊

**NODEJS** ★★★★★

Good understanding of V8's event loop, writing backend services and performance optimizations at high-throughput low-latency systems

**LINUX** ★★★★★

Deep understanding and knowledge of the linux internals. several years of managing physical data center

**AND MORE ...** ★★★★★★

Docker, AWS, React Native, Jenkins, Riemann, Apache Spark, Machine Learning
